@NATURA FURNITURE 2026

Naturally Unique Perfectly timeless

At Natura Furniture, we pride ourselves on importing and distributing high quality exotic wood furniture, direct from India. Each piece is carefully selected for its unique aesthetic, its solidity and its impeccable finish. We mainly use noble woods such as acacia, sheesham and mango wood, known for their resistance, natural beauty and warm nuances. Each essence brings its own personality, guaranteeing a touch of authenticity and charm to your interior. Our range is distinguished by a wide variety of styles, ranging from traditional models to more contemporary designs, while respecting the authenticity of Indian craftsmanship. In addition to their quality, our tables are offered at affordable prices, so you can add a touch of elegance and warmth to your kitchen without breaking the bank.

Trust our expertise to transform your living space with durable and timeless furniture, combining beauty and functionality.

Do not hesitate to contact us to discover our products.

Mango

- 75"W x 18"D x 20"H
- Mango wood

Warranty

We guarantee all our products for 12 months following purchase against any manufacturing defects.

Exotic wood is a noble and living material which can, over time, exhibit natural variations. It is normal for this wood to suffer microcracks or slight splits due to variations in humidity and temperature.

These small imperfections are part of its character and in no way affect the solidity or aesthetics of your furniture.

However, if a slot is wide enough to fit a credit card inside, this is not natural wear and tear. In this case, we will consider this as an anomaly and will process the request as after-sales service within 12 months of purchase.

TO UNDERSTAND BETTER:

Splitting: A small crack that does not compromise the structure of the wood, often located on the surface, with no effect on the solidity of the furniture.

Structural Cracking : A larger crack, which can be felt at depth and alters the stability of the furniture.

*** Small cracks can easily be camouflaged with wood wax touch-up pencils.*
